This template, saved as a "Word 97-2003 Document," provides the necessary formatting guidelines for preparing your paper. It ensures: (1) ease of formatting, (2) compliance with electronic requirements, and (3) consistent style across conference proceedings. Built-in settings for margins, columns, line spacing, and text styles are included, with examples throughout the document. For elements like equations, graphics, and tables, you will need to follow the provided guidelines.

A. Selecting a Template (Heading Style)

Ensure you have the correct template for your paper size. This template is designed for A4 paper. If using US letter-sized paper, download the appropriate template.

B. Maintaining the Integrity of the Specifications

The template controls your paper's format and style. Do not alter margins, column widths, line spacing, or fonts. These settings are designed for uniformity across all papers in the proceedings.

C. Figures and Tables

Place figures and tables at the top or bottom of columns, not in the middle. Large figures or tables can span both columns. Captions for figures go below, while table heads go above. Insert figures and tables after citing them in the text. Use "Fig. 1" even at the beginning of a sentence. Use 8-point Times New Roman for figure labels. Write out words for axis labels, e.g., "Magnetization" instead of "M." Include units in parentheses, e.g., "Magnetization (A/m)."

ACKNOWLEDGMENT

The preferred spelling of the word "acknowledgment" in America is without an "e" after the "g". Avoid the stilted expression "one of us (R. B. G.) thanks ...". Instead, try "R. B. G. thanks...". Put sponsor acknowledgments in the unnumbered footnote on the first page.
